Secretary's Message...

Let the life of the deprived bloom and blossom.

I am immensely delighted to share our experiences, achievements, challenges and activities of the KMSSS for the period of 2010-2011. This organization has grown from strength to strength with the predetermined plan, following a systematic approach according to the aims and objectives of the project and programme.

The KMSSS has successfully completed thirty seven years of social service programmes and hold many awards and merit certificates from the Government, Banks and Non Government organizations. Two decades before, the target population of below poverty level people were leading a simple, satisfied and transparent life of social solidarity with an average income of one \$ a day, per family. But, today the income of the family has been increased to 2 \$ per day, but traders, business community and Government employees only are managing with their income, whereas the poor strata though statistically show an increase in per capita income, their life style indicates a declining trend. People are very busy to find income, either fairly or in crooked way leaving the rights and lawful ways of social development and change.

The process of empowering the target population of a large number of individuals and groups to climb the ladder of growth towards the vision and mission of the organization is on the anvil to make them attain the state of self sustenance in life, helping people to help themselves.

The KMSSS has initiated two more new projects -1. TNVRC (Tamil Nadu State NGOs and Volunteers Resource Centre) with an aim to build capacities of community based organizations such as SHG, PLF (Panchayat Level Federation), Trainers of Mahalir Thittam to undertake projects on Women Development and 2. Vazhikattum Thittam, exclusively to benefit the disabled with welfare schemes in our area of operation. Streamlining the projects and programmes and sensitizing people on their changing needs and preparing them is a complex process, which we are experiencing and serving the people through enhancing the capacity of the people, staff and organization.

The IOB-KMSSS joint venture economic development scheme has been reintroduced this year to serve the economic viability of Dalits and people of the operational area.

We convey our sincere gratitude wholeheartedly to our beloved national and foreign partners for their generous assistance. We thank the Governing body, General body and RSO (Resource Support Organization) and Project Selection Committee for their unstinted cooperation and valuable expert opinions and suggestions.

On behalf of the organization and the people's representatives of the area, we earnestly pay our respect, regards and tribute to the Most Rev. F. Antonisamy, DD, STL, President, Bishop, Very Rev. Msgr. C. Peter Francis, V.G., Rev. Fr. G. Christuraj, Treasurer and our Joint Secretary Rev. Fr. A. Arul Prakasam.

The staff of the organization and the CBOs (Community Based Organizations) have rendered valuable support and enthusiastic efforts in execution of the programme and projects which need to be appreciated.

*With my warm good wishes,
Sincerely yours,*

Fr. S. Alphonse, Secretary.

A Shift in Agriculture Practices of Operation:

- Many people of the project area realized the importance and use of natural manure. As a result 75 families have been utilizing the natural manure in their farms.
- By using natural pesticides in the field, the farmers harvested more yields in groundnut and paddy cultivation comparing last year. More over the pesticides have been prepared as per the instruction given to them by the staff.
- In congruence of the global scenario, people were motivated to plant tree seedlings in their garden to have green house effect and as a result 107 farmers have newly planted fruit bearing tree seedlings which can give more income at a latter period.
- Animal rearing practices were promoted among them to facilitate natural manure preparation and use. Due to our education, 76 farming families have purchased goat, cow and poultries. They get good yield through use of these animal wastes as manure.

- Through use of natural manures and pesticides in their farm, the farmers are enjoying good yield of crops and income from Cashew nut cultivation.
- Neighbouring farming community of the project area villages, after seeing the benefit of natural farming method of cultivation, switched over to the traditional natural farming practices with vigour.

Revolving Fund:

From the repayment of revolving amount, during current year 120 families have received loan, at the rate of ₹10,000/- for each and utilized the assistance for productive and development purposes of land and crop management in the area of operation.
